

Texture Sound Path

Grades K - 2+

Purpose of this activity:

To link sounds with movement and tactile experiences, helping students internalize phonics concepts as well as work on beginning sounds.

What you'll need:

Different textured materials (for example, carpet squares, bubble wrap, sandpaper, etc.) and letter cards (or phonics sounds).

How to play:

1. Lay out the textured materials in a line or path on the floor.
2. Place a flashcard with a letter or phonics sound next to each textured material.
3. Walk along the path, stepping on each material as they go. When you step on a material, pick up the flashcard and say the letter or sound.
4. Try to think of a word that would describe how the texture feels and see if you can think of a word that begins with the letter you picked up (for example, "The rough sandpaper is like the sound 'r'.").
5. Continue until you reach the end of the path and have said the sound of each letter.
